Behind every great team is a man with a dream and enough drive or stubbornness to make the vision come true.

Martin Kopač is a *fourth-generation shoemaker*, who dedicated his life to making sure that little feet no longer suffer due to ill-fitting shoes.

He dedicated many years to the shoe industry, also being a *general manager of a big shoe company for 16 years.*

Furthermore, being **the first president of Footwear European Technology Platform**, he helped to promote and drive research and innovation towards business success in the footwear industry.

What he found out was shocking...

Too many children suffer from foot problems and deformities. In most cases, these are caused by ill-fitting shoes.

"The shoe industry should offer different widths for every model. Because if the children's shoes don't fit properly, they can later develop a foot problem of some kind. It can affect their posture and cause knee, hip or back issues."

- Martin Kopač

This is the Information Shoe Industry Giants don't want you to know about!

1

PROBLEM 1

University of Teubingen executed a research, measuring the feet of **children**'s feet and found out that **more than 50% of all children's feet are wider than average, and 20% of all children's feet are narrow** in the average.

2

PROBLEM 2

Way too often the shop assistant **doesn't have the time or the knowledge** to assist properly

3

PROBLEM 3

Children can't tell if the shoes are too tight – their feet are not fully developed yet and are therefore less sensitive to pain.

Our solution?

3 Widths – Exactly How It Always Should be

Every CAREFOOT model is available **in three widths**. Thus, every child can get a shoe that will **give** its **feet maximum support while still offering enough space for healthy growth.**
